

# Be Safe:

Keep Signs Away from Electricity Poles

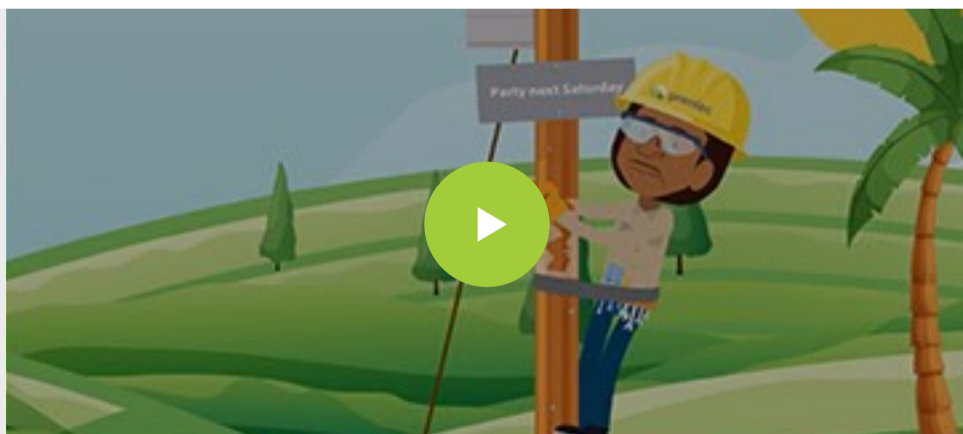

**For safety's sake, please do not put signs, posters, or banners on electricity poles.**

In an emergency, signs, nails, staples, and glue make it difficult for Grenlec linemen to safely climb poles - which delays response time.

Signs also cover the **Pole Numbers** that are necessary to report a fault. The Pole Numbers help Grenlec identify the exact location of the problem—which speeds our response and restoration.

Your safety is a top priority. In case of emergency, immediately contact Grenlec at 237 for assistance.
